

Dhanashree Ahire

Software Engineer | DevOps

Pune, Maharashtra, India | +91 8483830785 | ahiredhanu3421@gmail.com | LinkedIn | GitHub

Professional Summary

Software Engineer with nearly 2 years of IT experience with expertise in Python development, Linux environments, Shell scripting, and automation. Hands-on experience building CI/CD workflows, containerizing applications using Docker, and working with cloud technologies including AWS, Jenkins, Kubernetes, Terraform, Prometheus, and Grafana. Passionate about infrastructure automation, continuous learning, and improving software delivery processes. Immediate Joiner seeking DevOps and Cloud Engineering opportunities.

Technical Skills

Cloud Platforms	AWS EC2, IAM, VPC, S3
DevOps Tools	Docker, Jenkins, Kubernetes, Terraform, Prometheus, Grafana
Programming & Automation	Python, Shell Scripting, SQL
Version Control & OS	Git, GitHub, Linux (Ubuntu)
Networking Concepts	TCP/IP, DNS, HTTP/HTTPS, SSH, Load Balancing

Professional Experience

Tech Mahindra Limited
Software Engineer

Dec 2023 – June 2026

- Developed Python scripts to automate repetitive tasks and improve workflow efficiency.
- Worked in Linux-based environments and utilized Git for source code management and collaboration.
- Performed debugging, issue analysis, and Shell scripting for application support activities.
- Collaborated with Agile teams following SDLC practices and contributed to the application lifecycle.
- Supported application deployment, maintenance, and troubleshooting activities.

Projects

Cloud-Native Application Deployment and CI/CD Automation Platform

AWS — Linux — GitHub — Jenkins — Docker — Kubernetes — Terraform — Prometheus — Grafana — Python Flask

- Built an automated CI/CD workflow integrating GitHub, Jenkins, Docker, and Kubernetes.
- Containerized a Python Flask application and managed Docker image lifecycle using Docker Hub.
- Created Kubernetes Deployments, Services, ConfigMaps, and Secrets for application deployment.
- Automated AWS infrastructure provisioning using Terraform and implemented Infrastructure as Code concepts.
- Configured Prometheus and Grafana dashboards to monitor application and infrastructure metrics.

Linux Server Monitoring and Automation System

Python — Linux — Shell Scripting — Cron — Git

- Developed automation scripts to monitor CPU, memory, disk usage, and service health.
- Automated recurring maintenance tasks using Shell scripts and Cron jobs.
- Implemented log analysis and reporting mechanisms for faster troubleshooting.

Education

Bachelor of Technology in Computer Science and Engineering
Jawaharlal Nehru Engineering College

2019 – 2023
CGPA: 8.22

Certifications

- ISTQB Foundation Level Certification
- AWS Certified Cloud Practitioner
